

NETWORX

Brand Identity & Build Compass

The creator operating system, live discovery network, and music marketplace for independent audio creators — **plus Pro-Network**, the professional networking layer for every kind of creative.

Version: June 2026 (updated to match shipped product)

Brand status: The name is not changing. NETWORX is the app, the brand, the platform, the marketplace, the live radio network, and the creator operating system.

Replaces prior draft: storefront-first 30-day MVP compass with outdated palette (Royal Amethyst) and missing shipped features.

1. Brand Architecture

Item	Direction
Brand Name	NETWORX
Product Line	NETWORX Radio: The Butterfly Effect
Category	Creator OS; Music Marketplace; Live Discovery Network; Pro-Network Creative Network
Positioning	Always-on democratic radio, community voting, analytics, track sales, discovery placements, Pro-Network mentoring
Core Brand Line	Your Network. Your Sound.
Product Taglines (shipped)	The Butterfly Effect · By Artists, For Artists · Where the People have the Voice, and the Artist has the Power

Three metaphor systems (shipped):

1. **The Butterfly Effect** — Ripples, The Wake
2. **Metamorphosis** — Gems, Diamonds, Catalysts
3. **Mining the Frequency** — Prospectors, The Refinery, The Yield

2. Core Identity & The Mission

The Promise: NETWORX gives independent creators infrastructure to be heard, paid, and organized without surrendering ownership — live discovery, audience feedback, track sales, The Wake analytics, discovery placements, and Pro-Network networking.

The Void: Without NETWORX, creators fragment across disconnected tools. NETWORX is the central command center.

3. The Audience

Primary: Independent audio creators (\$5K–\$50K annual music-related earnings). Ambitious. Undermanaged. Monetizable.

Secondary (shipped): Prospectors (listeners) and Catalysts (service providers via Pro-Network).

4. Market Positioning

Enemy: Fragmentation tax across single-feature tools.

Lie exposed: Algorithmic reach alone equals a sustainable career.

Frame: What Shopify did for merchants, NETWORX is building for independent audio creators.

5. Voice, Tone & Messaging

Sophisticated, direct, empowering — artist as CEO. No begging, no corny hype.

Blacklisted: Buy Airtime, Cheap Promotion, Get Famous Fast, Exposure Only, Sign a Deal.

Use: Ripples, The Wake, The Refinery, The Yield, Trial by Fire, Discovery Placements, Pro-Networkx.

Push examples (shipped events):

- Your track is up next. Tap in.
- Your track is live on NETWORKX Radio.
- A listener bought your song.
- [Artist] just went live. Join the room.
- The Refinery needs your vote. Earn Yield.

7. Visual Identity (shipped tokens)

Color	Hex	Use
Obsidian Night	#0A0A0A	Base background (dark)
Butterfly Electric	#00F5FF	Primary accent (dark)
Studio Teal	#0E9AA7	Primary accent (light)
Deep Cobalt	#1A237E	Trust / verified accent
Daylight Canvas	#F4F6FB	Base background (light)

Note: Prior draft used Royal Amethyst #6A0DAD as primary — **not used** in production UI. Typography: Inter (UI), Space Grotesk (headings), Lora (campaign), Caveat (4 AM story).

9. Product Pillars — Implementation Status (June 2026)

Pillar	Status	Notes
Live Discovery	■ Shipped	Radio, fire/pass, temperature, Ripples, Trial by Fire, chat, livestreams
Direct Monetization	■ Shipped	Preview→purchase, \$1.99 placements, credits, Stripe/Play Billing
Creator Intelligence	■ Shipped	The Wake, ROI, heatmap, live platform stats
Prospector Rewards	■ Shipped	The Refinery + The Yield
Pro-Network Network	■ Shipped	Profiles, feed, services, directory, messaging (subscription)
Fan Ownership	■ Partial	Profiles, follows, library; no full storefront CRM yet
Infrastructure	■ Partial	Dashboard, admin, payments; Stripe Connect payouts on roadmap

10. Build Status — Beyond Original 30-Day MVP

The original compass targeted a storefront-first MVP in 30 days. **What shipped** is a broader radio + community + Pro-Networkx platform (web + Flutter mobile).

- Democratic always-on radio with synchronized playback
- Fire/pass voting, temperature, Ripples, competition leaderboards
- The Wake analytics, The Refinery, The Yield
- Discovery placements (\$1.99 / ~1,000 exposures)
- Direct-to-fan preview + purchase + library
- Pro-Networkx profiles, feed, services, directory, messaging
- Artist livestreaming + live chat
- Push notifications (FCM), Google/Apple/email auth (no Spotify OAuth)
- Light + dark theme, networkxradio.com + pro-networkx.com

Original MVP gaps still open:

- Standalone creator storefront + fan email CRM (as originally specified)
- Full Stripe Connect automatic artist payouts

Recommended next 30-day focus:

- Fan CRM + email capture on artist storefront
- Stripe Connect artist payouts (production)
- Play Store + App Store launch polish
- Pro-Networkx subscription Play Billing parity
- Founding 100 cohort tooling

11. Still on Roadmap (not required for current release)

- Spotify for Artists OAuth
- YouTube Analytics integration
- Automated DSP royalty aggregation
- Shopify / Mailchimp integrations
- AI recommendations
- Sync licensing marketplace
- Live Events ticketed showcases

Previously deferred — now shipped: Flutter native mobile app, FCM push notifications, Pro-Network module, Refinery, Yield, livestreams, light mode.

12. Product Copy (live)

Homepage (networxradio.com):

Join the movement and build your network.
Build your audience, team, and career in one platform.
CTAs: Get Started Free · Explore ProNetworkx

Player: Fire / Pass · Song temperature · Send a Ripple

Pro-Networkx paywall: Subscribe for DMs + contact info (\$4.99 intro → \$9.99/mo).

15. Final Brand Doctrine

NETWORKX is not here to make creators louder. It is here to make them stronger.

NETWORKX creates the culture. NETWORKX runs the backend. The creator keeps the power.
